

**SALON, FOUNDED BY
ALPER DERINBOGAZ, IS AN
ARCHITECTURE PRACTICE
FOCUSING ON TACTICAL AND
EXPERIMENTAL INNOVATION
IN CITIES.**

Salon, founded by Alper Derinbogaz, is an architecture practice focusing on tactical and experimental innovation in cities. We produce designs and studies in the fields of architecture, art, interior design and urbanism.

By focusing on research processes as the catalyst for an evolving engagement with the built world, we speculate on critical solutions for architecture. Collaboration and openness is important to our work. We value ideas and criticism. The collaborative character of the design and research methods result in developing contemporary solutions for architectural, interior and urban conditions. We value innovation, we investigate contemporary programs, execute latest fabrication technologies, and translate complex digital designs to buildings.

Recognized as an emerging and influential architect, Alper Derinbogaz investigates the possibilities of physical environment through the potential relationships between space and time. His design approach mostly relies on the importance of re-evaluating the context and intensifying it through interventions in multiple scales. Thus, his design varies in scale from the museums to installations, intending to uncover and question the essential elements of the given site and the theme.

Derinbogaz winner of Europe 40 Under 40 Award 2019, has gained many recognitions, awards and honours internationally including German Design Award in 2018, Good Design Award in 2018, World Architecture Award in 2017, Plan Award for Innovative Architecture in 2015, YAP Program of MOMA shortlist and A+ Architizer Award 2015. He represented Turkey in the 14th Venice Biennial International Architecture Exhibition in its debut year of the Pavilion of Turkey in 2014. Three of his built works, Gate, Panorama and Augmented Structures were included in the Best Architecture of the Year Selection, and received the Arkitera Young Architect Award in 2011.

He graduated from Istanbul Technical University in 2005. He received the Fulbright Scholarship for his master degree in Architecture and Urbanism Department at the University of California, Los Angeles by completing his degree with the UCLA Graduate Award. Derinbogaz founded Salon in 2010, referring to the French term, as a gathering space for emerging ideas or criticism. He still continues to lead his architectural design studio at the Istanbul Technical University as a senior lecturer.

VISIONARY CITY DESIGN

The act of building great cities requires big visions and a long view. SALON is a global leader in the development of long-range master plans for new and reimagined settlements centered on intelligent land use, transit-oriented and smart infrastructure.

REFINED LIVING ENVIRONMENTS

SALON create elegant and carefully detailed living spaces that both answer the client's needs and continually redefine modern living.

INTERIOR DESIGN

SALON enables clients to understand and capitalize on a vital dynamic that drives organizational performance; the relationship between people and the design of physical place and demonstrate that workplace design, ways of working place can deliver sustainable business value.

SALON combines research, strategy, and design for occupants, developers and owners, by listening to the aspirations and strategic needs of clients' and translating research into creative interior design solutions.

RETHINKING CULTURAL DESIGN

While architectural design differs greatly from culture to culture, SALON uses the freshness of contemporary design to culture unique identities for each client.
